About

Who We Are

Founded in 2004 with a vision to deliver innovative technology solutions, ADPL began its journey with a dedicated team of just five professionals and has since grown into a trusted organization with over 70 employees. Over the years, ADPL has established strong partnerships with leading global technology brands, becoming a distributor and authorized partner for renowned companies such as Panasonic, Kyocera, Konica Minolta, Epson, Hitachi, Delta, Vivitek, Infocus, and Sony. The company has continuously expanded its portfolio from document management and printing solutions to interactive displays, projectors, video walls, and digital collaboration technologies. In 2022, ADPL further strengthened its market presence by launching its own range of Interactive Flat Panels under the ADPL brand and registering them on the Government e-Marketplace (GeM). With a strong nationwide distribution network and a commitment to driving digital transformation, ADPL continues to empower organizations across education, government, enterprise, and commercial sectors with innovative and future-ready technology solutions.

Us

Imaging

Delivering advanced printing and document management solutions through industry-leading imaging technologies that enhance productivity, efficiency, and business performance.

Audio visual

Providing innovative audio-visual solutions, including interactive displays, projectors, video walls, and professional displays, to create engaging and connected environments.

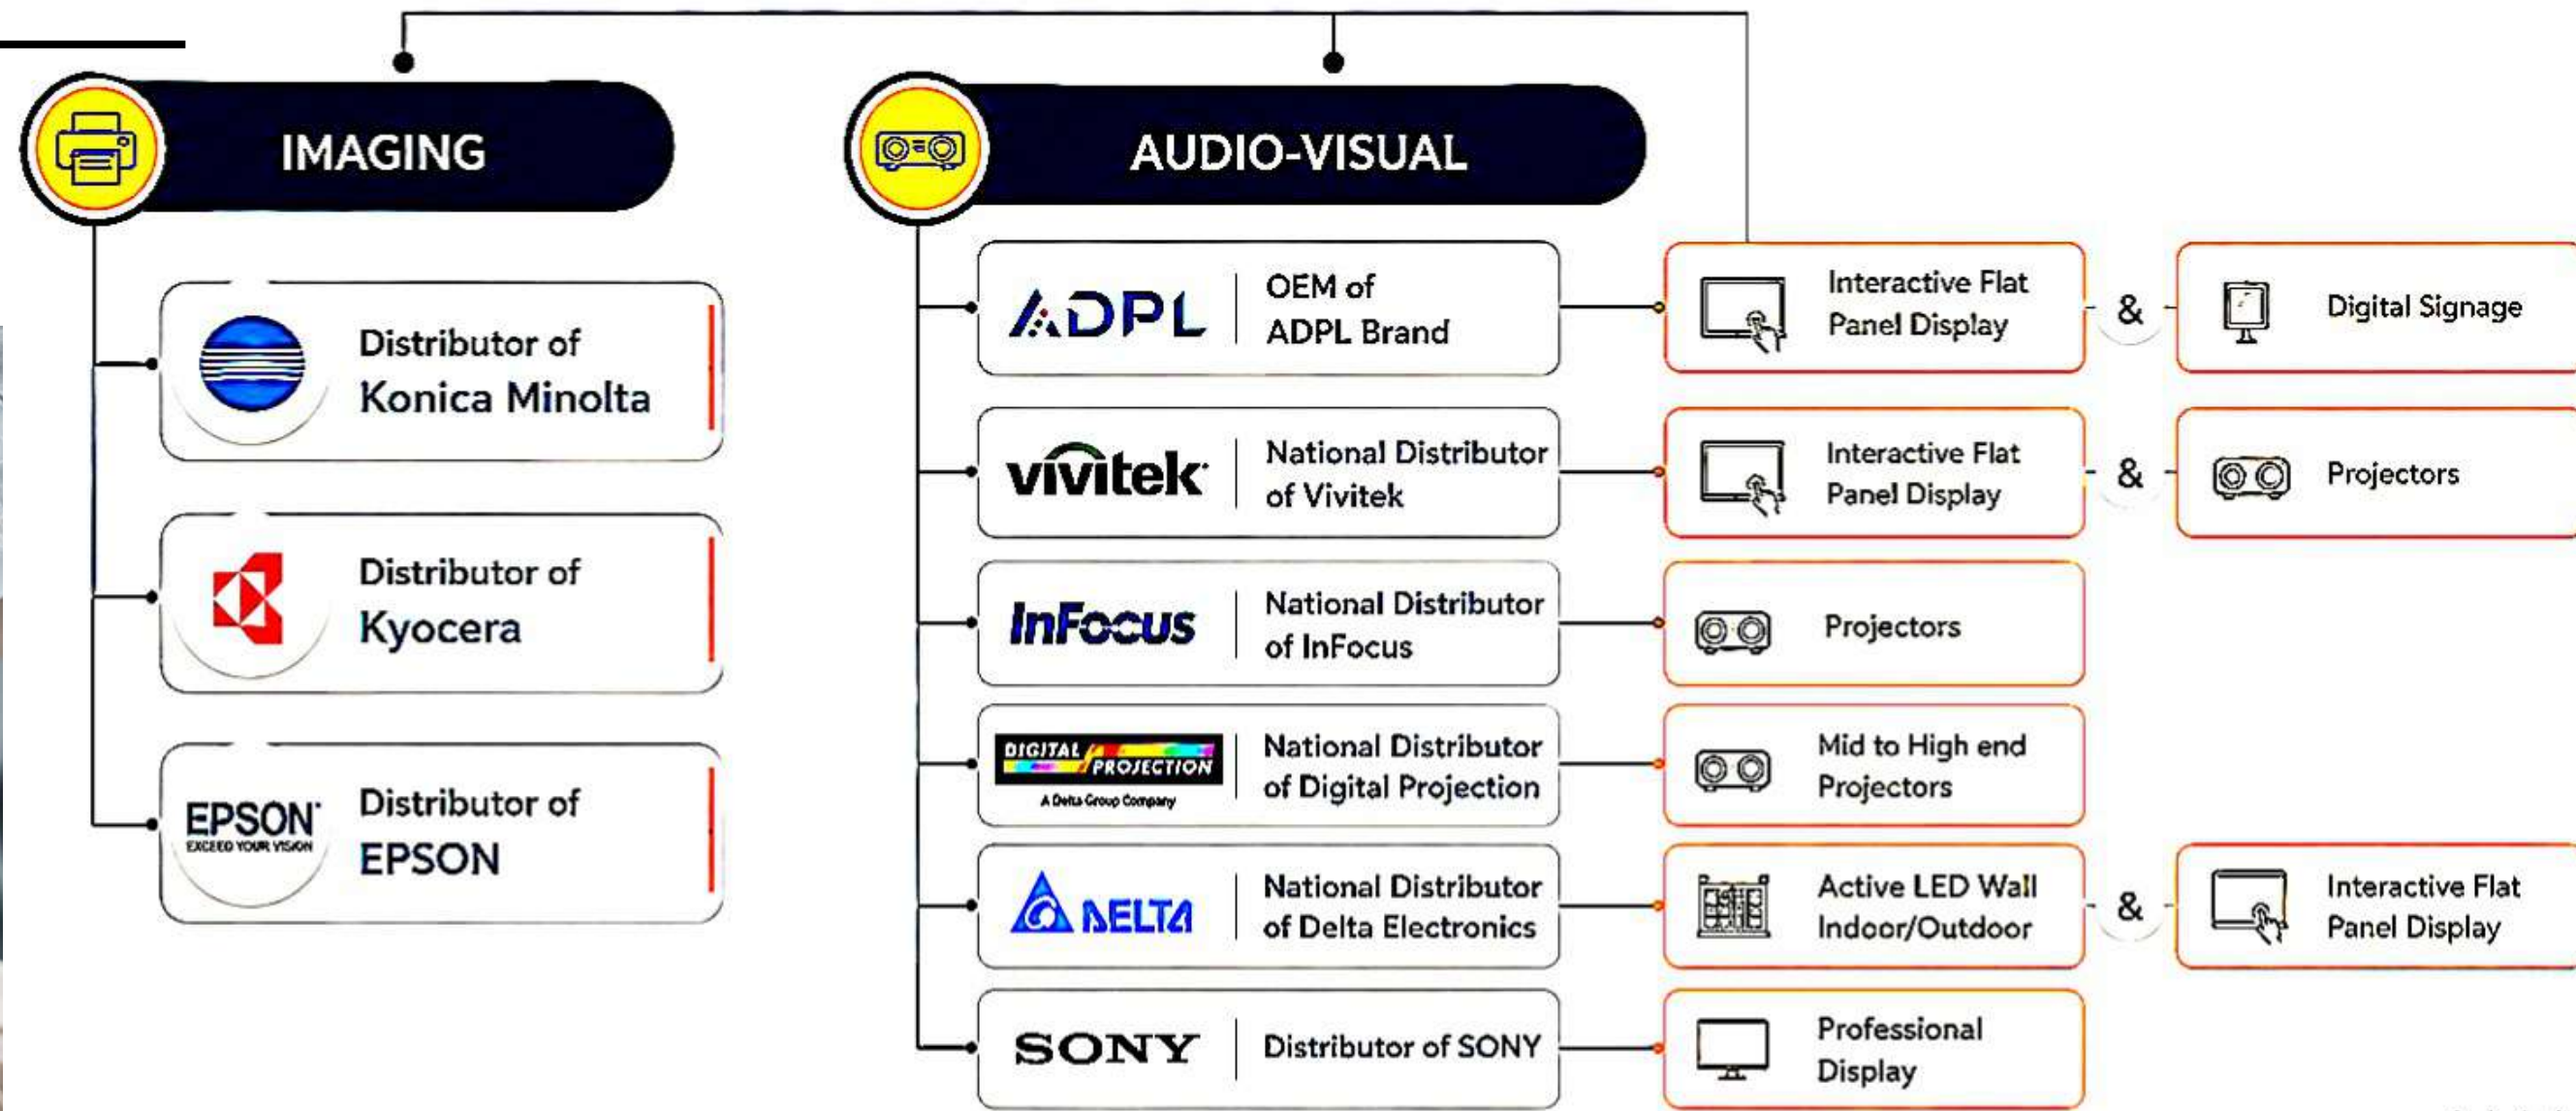

To lead the industry in sustainable and innovative solutions. And to make the company grow bigger and impact the world.

Our Business Areas

Our Services

Mission 1

To deliver innovative and reliable technology solutions that empower organizations to enhance productivity, collaboration, and digital transformation.

Mission 2

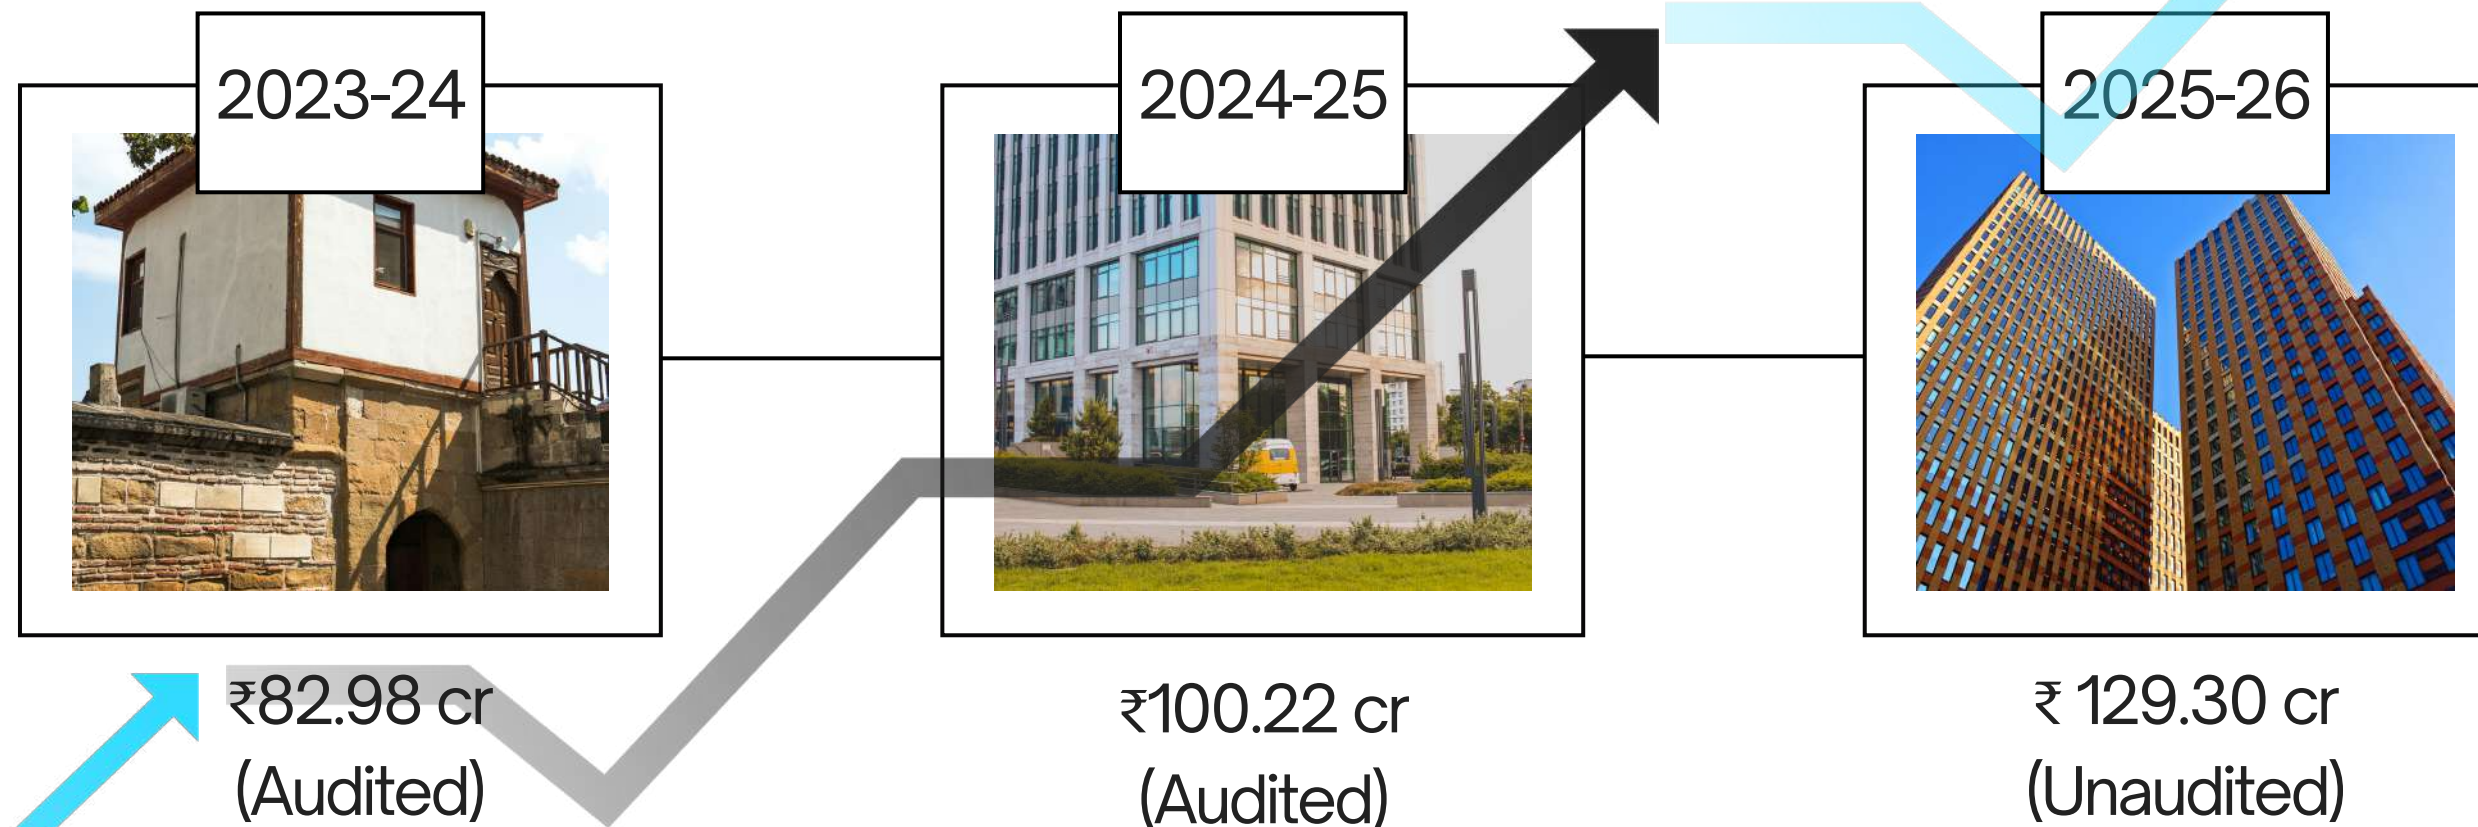

To build long-term partnerships by providing exceptional products, expert support, and value-driven services that exceed customer expectations.

Mission 3

To continuously expand our technology portfolio and market reach while maintaining the highest standards of quality, integrity, and customer satisfaction.

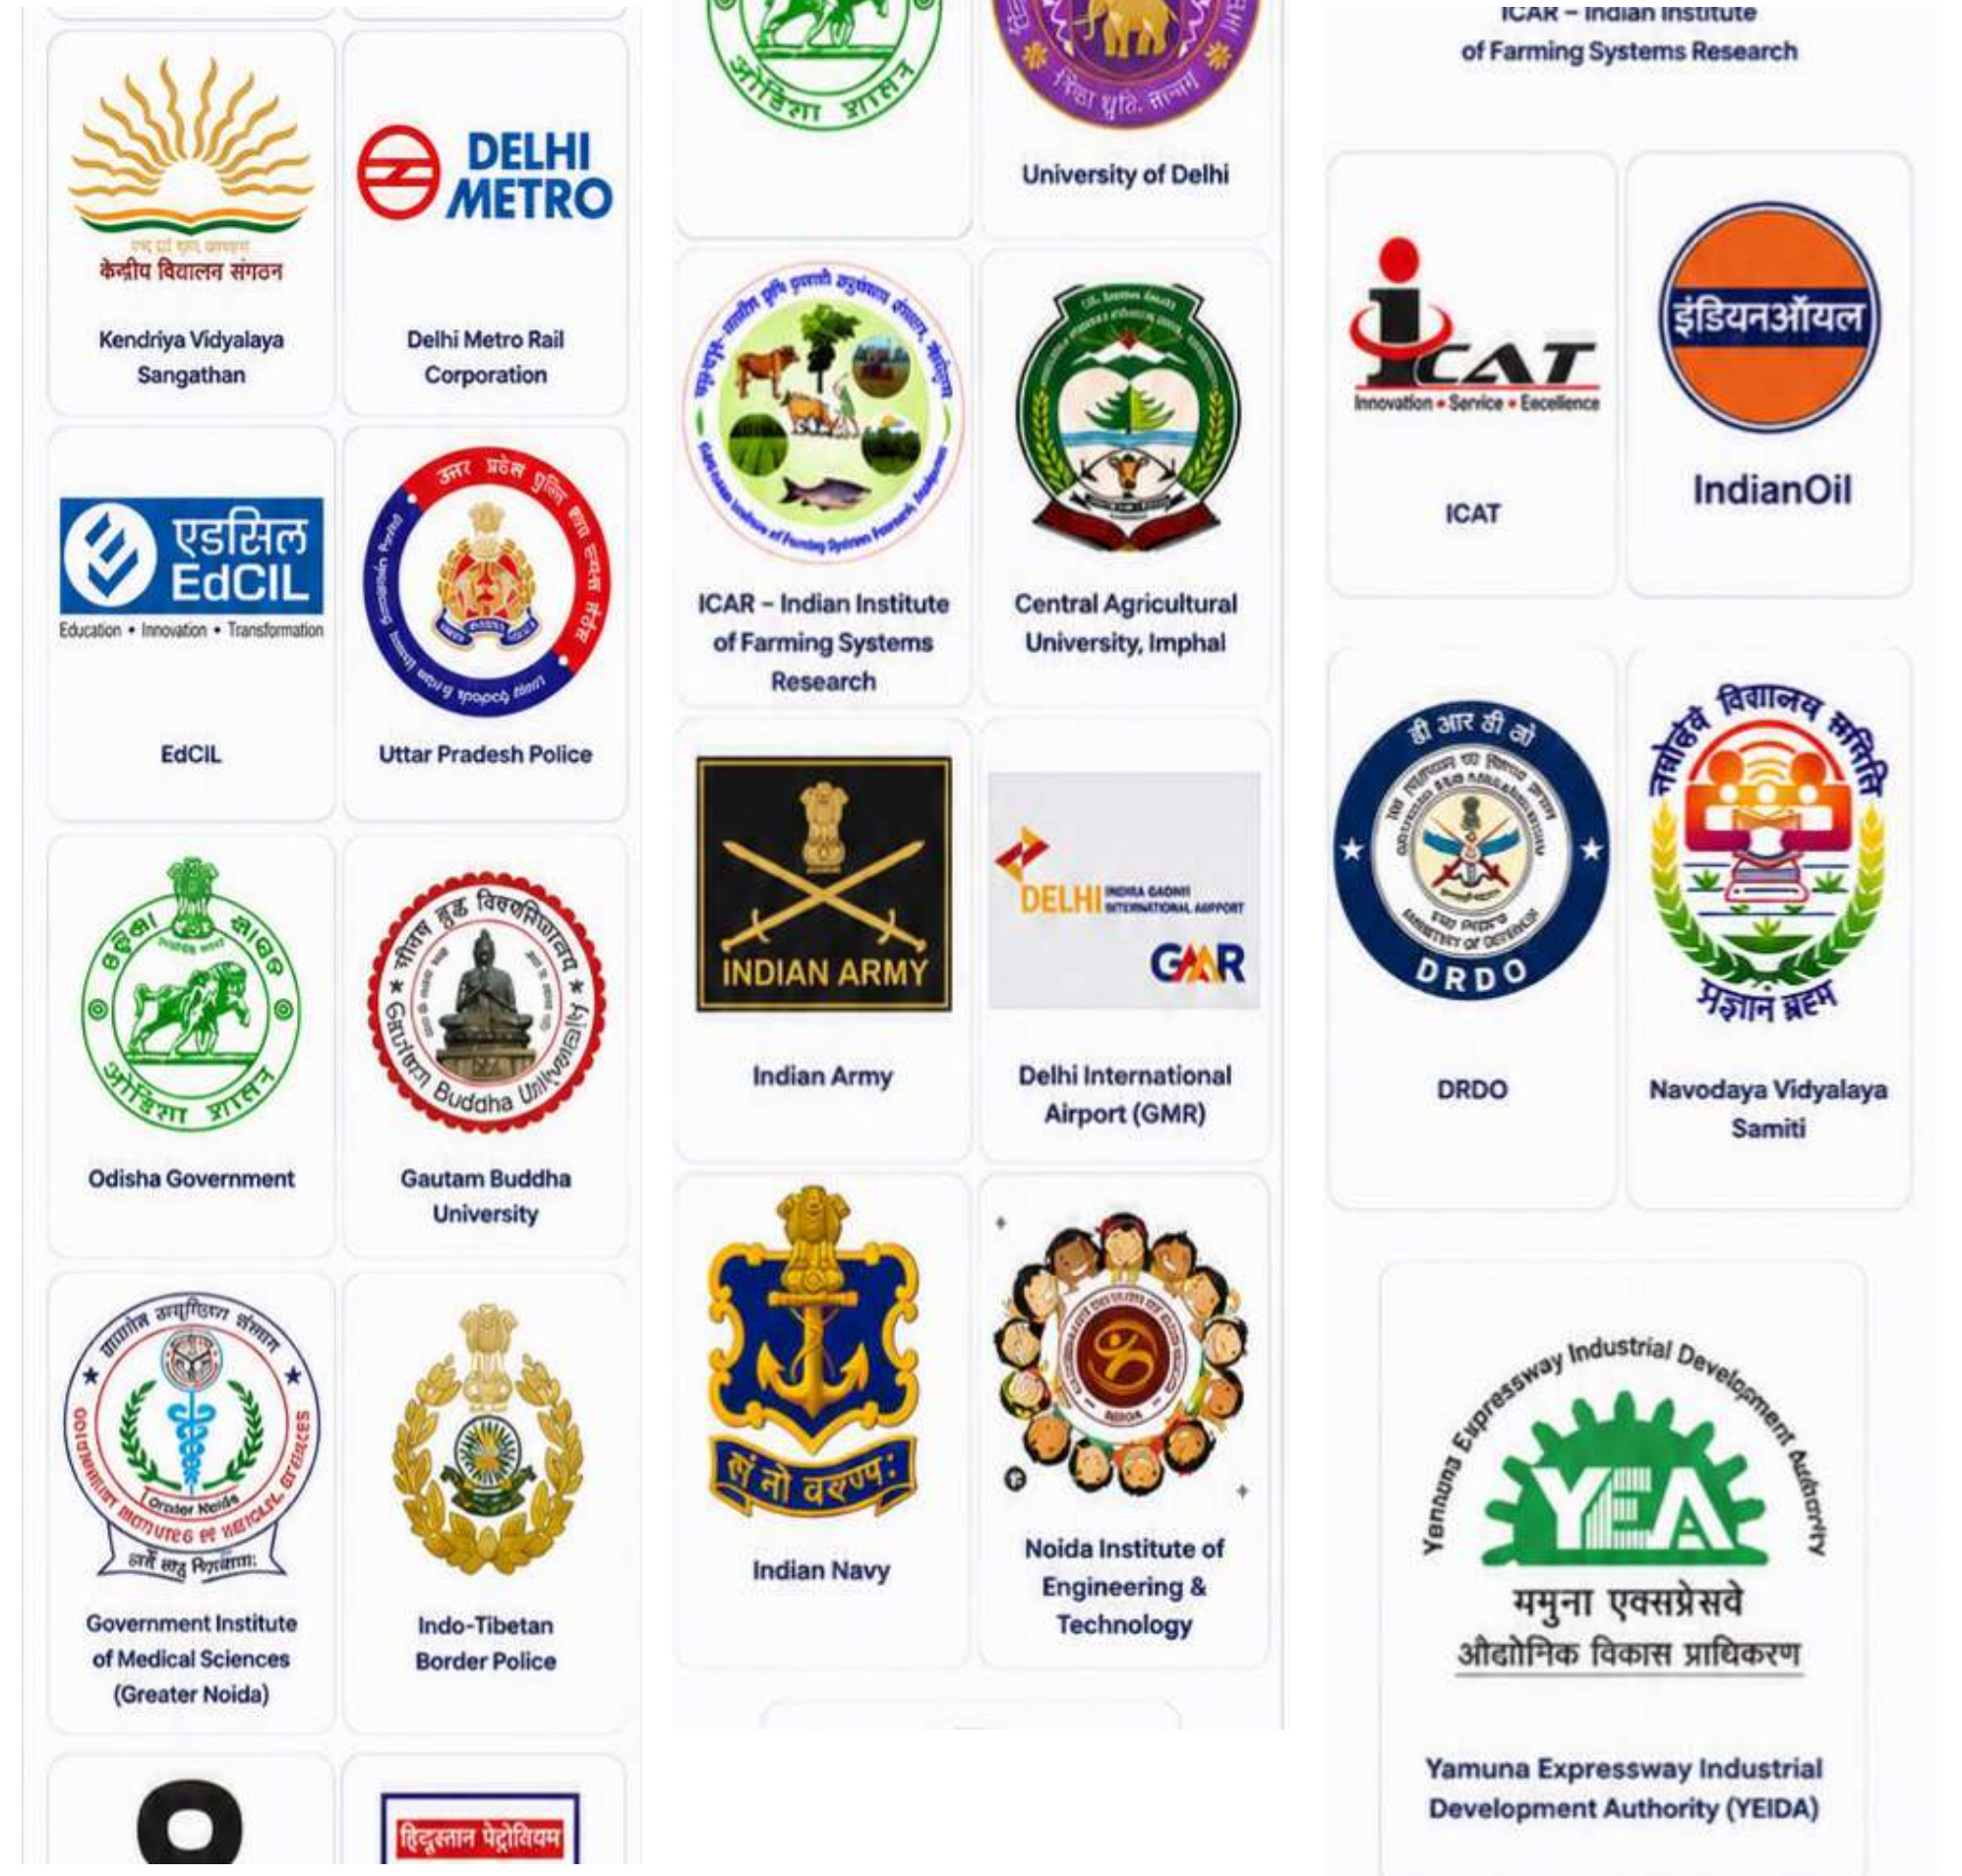

Our Journey & Financials

"Sustained growth is not achieved by chance; it is the result of vision, innovation, and consistent execution."

Meet Our Few → Customers

Trusted by some of India's most respected organizations, we continue to deliver innovative technology solutions that create value, drive growth, and strengthen long-term partnerships.

Our Projects

"Transforming Anganwadi Centers into vibrant learning spaces that inspire curiosity, creativity, and lifelong learning."

ECCE KIT PROJECT (Jaadui Pitara)

- Designed to support Early Childhood Care & Education (ECCE) in Anganwadi centers through activity-based learning.
- Provides a comprehensive set of educational resources that promote cognitive, sensory, language, creative, and motor skill development.
- Includes learning materials such as puzzles, building blocks, flash cards, lacing tools, play dough kits, role-play sets, and art & craft supplies.
 - Encourages curiosity, creativity, problem-solving, communication, and collaborative learning through interactive activities.
- Helps children develop fine motor skills, critical thinking, and social-emotional competencies during their formative years.
 - Integrates cultural and scientific learning tools to foster imagination, exploration, and experiential learning.
 - Supports a smooth transition from Anganwadi centers to formal primary education.
 - Empowers Anganwadi workers with innovative teaching resources to create engaging and child-friendly learning environments.
- Contributes to the holistic development of children, nurturing their intellectual, emotional, physical, and social growth.

Our Projects

What We've Done

Digital Classroom for EMRS schools

EMRSs provide free education to ST children from class VI to XII in residential set up. The scheme is being implemented by the Ministry of Tribal Affairs, Government of India.

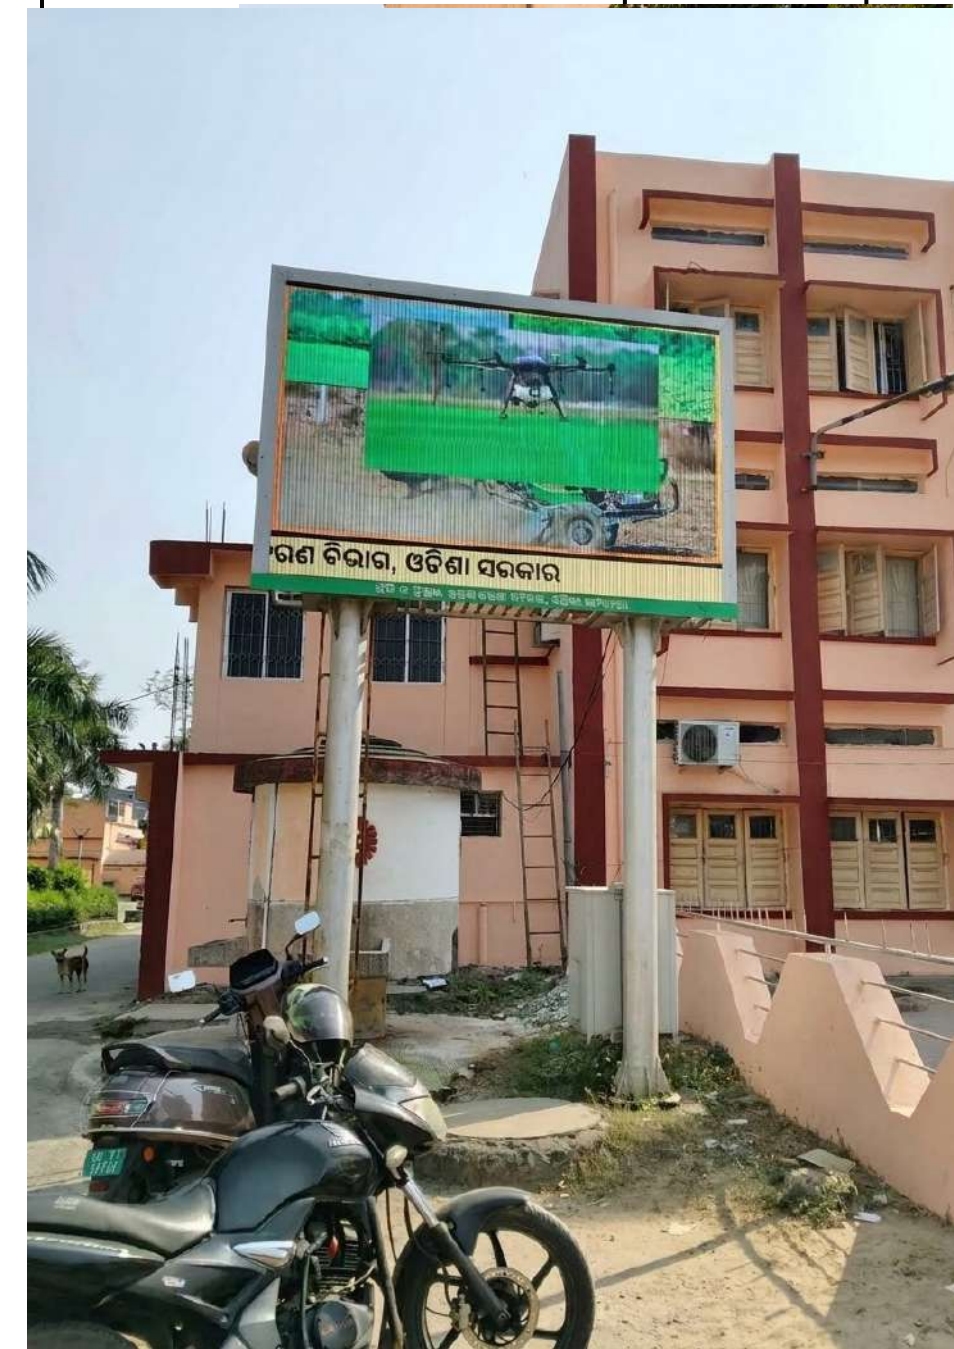

We have established smart classrooms in EMRS schools across Odisha, Andhra Pradesh and Telangana to enhance the medium of education.

Video Wall Installation : Ministry of Agriculture

As part of an innovative initiative by the Ministry of Agriculture, we have deployed high-resolution Active LED display walls across 58 strategic locations throughout Odisha.

- These outdoor digital displays serve as powerful communication tools, enabling centralized information dissemination from a single control point.
-
- The network of LED walls facilitates real-time broadcasting of crucial agricultural updates, weather forecasts, and market information to farming communities. The centralized management system ensures consistent and synchronized content delivery across all 58 locations, maximizing operational efficiency.

Our Projects

What We've Done

CURVED OUTDOOR PANNEL

Outdoor Panel Project
A high-performance outdoor LED display project designed to deliver bright, vibrant, and reliable visuals in all weather conditions. Engineered for public communication, advertising, and digital information displays, the installation ensures maximum visibility, durability, and seamless performance in outdoor environments.

Curved Outdoor LED Display

High-resolution Display for Impactful Visual Communication

TARAPORE PATIALA

Tarapore, Patiala Project
A modern LED display solution delivered for the Tarapore project in Patiala, designed to provide high-impact visual communication with exceptional clarity and reliability. The installation enhances presentations, information sharing, and audience engagement through advanced display technology tailored to the project's requirements.
